### 1-1 Rules

#### COMMUNICATION

*I'm giving you guys basically free reign over the server, i really don't want to be dealing with your*

*personal problems if it isn't in TOS. The fact that i needed to make this as well is kinda WeirdChamp.*

- Respect the ones that helped getting the server started that day. You waste a lot of time by doing it. This doesn't mean however that you can play the entire evening without anyone else having a good farm round. Not everyone has the time to put into starting the server and just want a good game of BF4.(This comes down to communication again)
- When using the ticket and map commands make sure to:
  - Tell other admins that you want to play a max/higher ticket round
  - Not farm the server to death
    - You can farm on prime hours it doesn't really impact the server that much even tho it might drop a few players.
    - At most it drops to like 40 players and depending on map will take a bit to fill up
    - Fully killing it during these times doesn't happen often if ever
  - Let others farm as well.
- Any conflict can be avoided by simply stating your intentions if you see someone already playing.
- Be responsible with banning people. Idgaf about kicks, if people are annoying start with tban after that you could ban. Unless obvious cheaters they can get permd instantly. I'll mention adkats commands later.
- Try to avoid to farm the server to dead mostly during the night if the server survives the night it's easy early farm for all of you.
- Don't play 24/7 you're not alone.
- **Vehicle peace** or **air peace** won't be tolerated anymore. It is nice to both farm but it can kill a server real quick. If i or other FULL ADMINS see it happening you risk getting kicked.
- Be reasonable, don't let your hatred or lack of skill get the better of you...

## 1-2 Must read

- When using ticket commands do it between rounds not during a rounds
- Ticket count changes automatically to normal on round END
- Changing to a map needs to be done to maps that are currently in the maplist, if they are not the command won't work.
- Votemap will be disabled if you change the next map
- Votemap will be enabled on every round start

## 1-3 ProconRulz commands

Command	Description

/restart	Restarts rounds <b>Use this only in a empty server to switch to a seeding map</b>

## 1-4 Adkats commands

All commands can be found here: [Adkats](#)

I'll be going over the more useful ones for u.

**Using a command without any name or reason will result into the command being used on yourself (self-inflicted)**

Command	Description
!ban	Permanently bans the targeted player
!tban60	Temp-Ban 1 hour
!tban120	Temp-Ban 2 hour
!tbanday	Temp-Ban 1 Day
!tbanweek	Temp-Ban 1 Week
!tbanmonth	Temp-Ban 1 Month

!punish	The in-game command used for punishing players. Will add a Punish record to the database, increasing a player's total points according to your settings, and issue the configured action for that point value.
!accept	The in-game command used for accepting reports as confirmed.
!reportlist	The in-game command used to get the latest 6 unanswered round reports.
!pull	Forces the targeted player into your squad
!join	Joins the squad of the targeted player

## 1-5 ACP

*This is only for FULL ADMINS, budget bois sorry but i won't activate your accounts.*

There is the possibility to access the admin control panel of adkats: [ACP](#)

To register an account: [Register](#)

The image shows a web interface for BFAdminCP. At the top, the text 'BFAdminCP' is displayed in a large, bold, dark font. Below this, there is a white rectangular area containing the login and registration options. Inside this area, there are two light blue input fields. The first field contains the text 'Matti'. The second field contains a series of dots, indicating a password. Below these fields, there is a checkbox labeled 'Remember Me' and a blue button labeled 'Sign In'. At the bottom of the white area, there is a link that says 'Create an account', which is highlighted with a red rectangular border.

Once you have done that DM Matti#9999 so he can activate your account with the right permissions. Don't wait for an email to arrive since that function is broken.

# 1-6 Locker

As full admin you won't be affected by any weapon rule apposed to the weapon enforcer.

- Don't abuse this, people will start to cry real fast if you run shotguns
- For minor things like M320 FB etc you can get away with just be careful and read chat with it.
- I do forbid using shotguns if there's another admin in the opposite team.
- Balancing is hard since there are 2 factors tickets / Flags
  - Try to avoid a full base rape *regardless of the amount of tickets*
  - Don't all switch to one team as this inbalances things in the other way.
  - Be smart about balancing, i get that it's not easy but everyone knows how good an individual is.

## 2 VIP commands

Command	Description
!lead	Gives you squadleader of your current squad
!moveme	Moves you to the other team
!killme	Server admin kills you

## 3 Admins

User	Accounts	Power level
Matti	- MattiBoss999_TTV -BetterGamer -MattiBoss9999	Owner
Hydraz	-Synthogy -1bicmitchum -1hydraz -SynthGoLive	FULL ADMIN
Hawx	-Zunnni	FULL ADMIN

User	Accounts	Power level

Elijot	-HalalMyMain	BUDGET ADMIN
lHawkee	-lHawkee -T13_Boomer	BUDGET ADMIN

- Respect the hierarchy
- The order of the same power level doesn't really matter but you get the idea
- OWNER > FULL ADMIN > PAPA BEARD > BUDGET ADMIN

## 4 Punishments

- 1 Ignoring these specified rules can get you kicked from the Server
- 2 Repeatedly violating these rules might even get you temp banned
- 3 Matti always has the last word.

## 5 Banning

## 5-1 Cheaters

This is somewhat a guideline as we don't run any anti cheat for obvious reasons. I'm a forgiving person, i give DB banned people a 2nd chance here. If however that trust is violated the chances of u getting a unban is nearly non existent. (This applies to all cheaters)

Rage hackers and obvious cheaters can be deported instantly. If however it's subtle or you suspect someone to be cheating.

- 1 Check BF4DB

- 2 Check stats etc

If you are convinced DM Matti. I'll be the deciding factor.

## 5-2 Ban appeals

The person that banned the victim will be the deciding factor in a unban. Rage bans handed out will probably get unbanned by me whenever i check the ban list.

The ban appeals is also what usually keeps all of you entertained so yes have fun.

### In case of an actual cheater

Give them a 2nd chance but once that's violated well hahahahahahahahah gone. It also depends on how bad it was.

## 5-3 Anticheat Script

This will catch most rage hackers. The way it works it checks "DPS", "HSKR" and "KPM". If you get banned for it just dm i'll whitelist. It's somewhat adjusted to high stats but it could happen it still bans.

*Happy farming 😊*
